

RITRANSPARENCY REPORT 2020

Ireland Strategic Investment Fund (ISIF)

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the PRI website, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

Fund Background

In December 2014, the assets of the National Pensions Reserve Fund (NPRF), mainly liquid global assets, transferred to the Ireland Strategic Investment Fund (ISIF). The ISIF has a unique "double bottom line" mandate to invest on a commercial basis in a manner designed to support economic activity and employment in Ireland, and invests mainly in Irish assets in private markets. The NPRF Discretionary Portfolio was made available to the ISIF to enable it to make investments that meet this mandate. The global assets are transitioned over a multi-year period to provide liquidity for Irish investment opportunities as they are identified and executed.

The Directed Portfolio (primarily public policy investments in AIB and Bank of Ireland made during the financial crisis in 2009-2011) continues to be managed within the ISIE under direction from the Minister for Finance.

The ISIF's double bottom line mandate makes it one of the few sovereign wealth funds globally with a mandate to contribute to economic activity and employment, in addition to delivering commercial returns. The ISIF is required to seek to generate a return over the long term in excess of the cost of Irish Government debt.

In July 2018, it was announced by the Minister for Finance that \leq 1.5 billion of ISIF funds would be re-allocated to meet other capital requirements. \leq 1.5bn was transferred from the ISIF to the newly established National Surplus (Exceptional Contingencies) Reserve Fund (the 'Rainy Day Fund') following its establishment in October 2019. An additional \leq 750 million will allocated to the Home Building Finance initiative and a further \leq 1.25 billion to the Land Development Agency.

At end-2019, the value of the ISIF Discretionary Portfolio was €8.1bn, comprising global assets of €5.4bn and Irish assets of €2.7bn, and the value of the Directed Portfolio was €6.9bn. As at year-end 2019, the Discretionary Portfolio accounted for 54 % of the value of the Fund.

The Fund's Sustainability and Responsible Investment Strategy (SRIS) applies only to the Discretionary Fund and ISIF's PRI reporting reflects this throughout.

2015 Investment Strategy (ISIF 1.0)

In May 2015, the NTMA Board approved the 2015 ISIF Investment Strategy, following consultation with the Minister for Finance and the Minister for Public Expenditure and Reform. The key features of the 2015 Investment Strategy included;

A broad-based Portfolio; across sectors, regions and asset classes

 ${\sf ISIF's \ Key \ Differentiators; \ Scale, \ flexibility \ across \ the \ capital \ structure \ and \ long-term \ investment \ horizon.}}$

Co-investment; Attracting co-investment partners where possible so that the impact of ISIF investments will be multiplied in the Irish economy. Return; Risk-adjusted rates of return appropriate to the specific characteristics of each individual investment.

2019 Investment Strategy (ISIF 2.0)

ISIF's 2025 ambition is to exceed the investment return benchmark and make sustainable progress under the Priority Themes.

The key features of the 2015 Investment Strategy are broadly unchanged under ISIF 2.0, specifically ISIF's key differentiators, the focus on co-investment and return (both commercial and economic impact return). ISIF's revised 2019 Investment Strategy, guided by the objectives of Project Ireland 2040, will target a €3 billion 5-year investment programme which will focus on five Priority Themes of key importance to the Irish economy: Regional development, Housing, Indigenous businesses, Climate change and Brexit. In addition, the Fund will continue to pursue investment opportunities that are suitable for its Connectivity Fund sub-portfolio, which includes existing investments in airport and port infrastructure and projects that enhance Ireland's global data and IT connectivity. The Fund will also maintain flexibility to selectively take advantage of compelling opportunities which are consistent with the Fund's mandate and do not fit under the priority themes.

Sustainability and Responsible Investment for a new mandate

The transition from the NPRF to ISIF involved the development and implementation of a new investment process for Irish investments together with the complex restructuring of the Fund's Global portfolio, which now has a shorter time-horizon.

The challenge is to implement RI/ESG in a broadly consistent manner across two very different portfolios (shorter- term Global portfolio and longer-term Irish portfolio) as the Fund progresses through this transitionary stage from a well-established Sovereign Wealth Fund to a Strategic Development Fund.

Each year, the PRI reporting is quite different to previous years responses as the Fund evolves. For the purposes of this report assets as at year end 2019 are reported, but additional descriptive information is provided throughout as appropriate. Some Irish investments are being included for the first time.

In 2019, the RI team continued to implement the ESG Framework across all investments and ensured that ESG due diligence was carried out on all investments (through ESG DDQs or tailored due diligence). There was also an increased focus on carbon metrics and measuring the Fund's carbon exposure at investee and portfolio level. An updated S&RI Strategy 2020 with increased emphasis on addressing climate change is currently being finalised.

Further information on the Fund, its mandate and investments to-date are available on the Fund's website: www.isif.ie

The value of the Discretionary Portfolio as at 31.12.2019 is €8.1 billion. These are the assets for PRI reporting.

The dual objective mandate of the ISIF - investment return and economic impact - represents a new approach to investing for the Fund and will require all investments to generate both investment returns and economic impact in Ireland, thereby re-configuring the ISIF from a sovereign wealth fund into a sovereign development fund.

Past Fund History (from NPRF to ISIF)

The National Pensions Reserve Fund of Ireland was established in April 2001 "for the purpose of meeting as much as possible of the cost to the Exchequer of social welfare pensions and public service pensions to be paid from the year 2025 until the year 2055", as set out in the National Pensions Reserve Fund Act, 2000.

The Fund's legislative remit was extended in 2009 and 2010 to allow the Minister for Finance to direct the NPRF Commission to invest in credit institutions in certain circumstances and in Government and Government-guaranteed securities and to make payments to the Exchequer to fund capital expenditure in the years 2011 to 2013. As a result of these changes the Fund now comprises two separate Portfolios: 1. Discretionary Portfolio 2. Directed Portfolio (public policy investments in AIB and Bank of Ireland) These "Directed Investments" are monitored, managed and reported on separately from the main "Discretionary Portfolio".

In June 2013 the Government announced its legislative proposals to establish the Ireland Strategic Investment Fund (ISIF) on a statutory basis and stated that its mandate would be to invest on a commercial basis to support economic activity and employment in Ireland. The NTMA (Amendment) Bill was published on 15 May 2014 and subsequently enacted on 28 July 2014. The commencement of the Act (22 Dec 2014) involved the dissolution of the National Pensions Reserve Fund Commission, with oversight and management of ISIF passing over to a new overarching NTMA Board ("the Agency") and its Investment Committee.

Following ISIF's establishment, its initial investment strategy was approved by the NTMA after consultation with the Minister for Finance and the Minister for Public Expenditure and Reform and published in July 2015. The investment strategy was reviewed in 2017-2018, in compliance with the 2014 Act, which requires a periodic review of the strategy and the strategy was amended to reflect the rapidly improving economic situation of Ireland and changing opportunity set for the ISIF.

In July 2018, the Minister for Finance and Public Expenditure and Reform announced a refocusing of the ISIF within its overall policy mandate centered on five key economic priorities: (i) regional development; (ii) housing supply; (iii) indigenous industry; (iv) projects to address climate change; and (v) sectors adversely affected by Brexit.

Updates to the Global Portfolio for year end-2019

In July 2018, it was announced by the Minister for Finance that €1.5 billion of ISIF funds would be re-allocated to a new Rainy Day Fund with an additional €750 million to be allocated to the Home Building Finance initiative. Consequently, €750 million has been advanced to Home Building Finance Ireland and €1.5 billion of ISIF capital was allocated to the Rainy Day Fund following its establishment. Subject to requisite legislation, €1.25 billion will be allocated to the Land Development Agency.

00 11.4	Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

We address ESG incorporation in our external manager selection, appointment and/or monitoring processes across both the Fund's Global and Irish portfolios.

The consideration of RI/ESG differs across these portfolios given the nature of the investments. We look for high level commitment from all managers and acknowledge that the degree of integration of ESG will differ substantially across each of the mandates.

The Global Portfolio underwent a significant restructuring in H1 2016.

As part of this process ISIF tendered for a wide range of managers and mandates to meet the needs of its unique mandate. ESG considerations were part of the tender process and were scored as part of the assessment of Investment Strategy and Philosophy of each tendering party

The vast majority of appointed managers are PRI signatories (>80%).

The nature of the individual mandates vary, as does the degree of ESG integration across the Managers. In addition, all managers are subject to exclusions as per ISIF's statutory obligations under the Cluster Munitions and Anti-Personnel Act, 2008 and this was written into their legal agreements via IMA's or side letters.

ESG/RI is a standard part of Manager regular review meetings and oversight, as are their PRI Transparency and Assessment reports where available.

In addition to requirements under the Cluster Munitions and Anti-Personnel Mines, Act 2008, Tobacco Manufacturing companies are excluded from all segregated debt portfolios since Dec 2016 and High Carbon Fossil Fuels from Dec 2017. Furthermore, in Dec 2018 the Fossil Fuel Divestment Act was enacted, resulting in the prohibition of investment by ISIF companies that generate >20% of turnover from the exploration, extraction or refinement of fossil fuels. The Fossil Fuel Divestment Act effectively supersedes the High Carbon Fossil Fuels list and as of Dec 2019 ISIF prohibited 211 fossil fuel related companies from its investment universe.

The Irish Portfolio:

Responsible investment considerations in the investment manager selection, appointment and monitoring processes differ for each Fund given their ESG approaches - particularly as this portfolio is largely invested in real assets and/or private equity/debt.

RI/ESG is considered at each point in the Investment process from early assessments through to detailed due diligence to final legal agreements. We have developed an ESG framework for ESG integration through the investment decision making process for Irish investments. In 2019, ISIF strengthened the focus of climate change risk, and developed measures to monitor the carbon exposure of the ISIF portfolio. All new investments must also include a climate assessment at the due diligence stage.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

The NTMA's investment approach is founded on the principle that the design of the ISIF portfolio should reflect solidly based investment beliefs, which capitalise on its competitive advantages that deliver a risk diversified portfolio. Those investment beliefs, as they relate to responsible investing, include, but are not limited to the following:

- Regulation can affect the price of assets by influencing the type of assets which regulated institutions demand.
- Real assets will outperform financial assets over the longer term, driven by economic growth, which in turn is driven by productivity gains and demographics.
- Risk diversification is critical.

Other RI considerations, specify (1)Other RI considerations, specify (2)

- A long-term investment horizon is an advantage given short-term volatility, which is inherent in real asset investments, can be accepted as a trade-off for higher return.
- Environmental, social and governance factors can affect long-term portfolio performance
- All else being equal, lower volatility is better than higher volatility.
- Risk is multi-faceted and not fully quantifiable.

As part of its revised Sustainability and Responsibility Strategy 2020 the Fund has also devleoped a set of Key Responsible Investment Principles highlighted below.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

The Fund published its first Sustainability and Responsible Investment (S&RI) Strategy in 2017 which is available on its website and states its commitment to Climate as a priority ESG issue. Notably this was signed off by both the NTMA Board and the Minister for Finance. The updated S&RI Strategy was developed in 2019 and will be published in Q2 2020.

In February 2019 it was announced that the ISIF's wider investment strategy has been revised to focus on a number of key pillars- one of which is Climate change and going forward the Investment team will be focusing effort on both Climate positive opportunities in the renewable energy, heat, transport and Food and Agri sector together with broader Climate risk mitigation across all investments where it is a material issue.

The ISIF is a signatory of the UN-sponsored Principles for Responsible Investment (PRI), which focus on the management of environmental, social and governance (ESG) factors to improve sustainability of investment returns. PRI reporting involves significant disclosure of ESG related risks with emphasis on climate.

The Fund implements its Sustainability and Responsible Investment policy in several ways, primarily by (1) focusing on integration of environmental, social and governance (ESG) factors into its investment decision making pre-investment and (2) by being an engaged and active owner of its investments to positively influence companies. ISIF applies the principles of these approaches to both its Global and Irish portfolios and is also starting to measure GHG emissions across both portfolios where possible.

The Fund is also a long time CDP signatory (formerly the Carbon Disclosure Project), the leading global disclosure platform, and has actively supported both the establishment of the Irish CDP network (including acting as a past chair).

ISIF Key Responsible Investment principles:

- To deliver long-term sustainable returns, ISIF needs to think long-term.
- Sustainable returns will be achieved from well governed and sustainable assets.
- ISIF will apply materiality-based decision making in the implementation of our S&RIS.
- · ESG risks vary between asset classes, sectors and companies, we adapt our approach and strategy as appropriate
- · Climate change presents a systemic risk that ISIF has to consider as part of its portfolio risk management.
- . ISIF will be transparent and accountable in all we do and in how we invest.

Irish Portfolio

Responsible investment considerations for the Irish Portfolio investment in the investment manager selection, appointment and monitoring processes differ for each transaction given their ESG approaches - particularly as this portfolio is largely invested in real assets and/or private equity /debt

RI/ESG is considered at each point in the investment process first early assessments through to detailed DD to final investment committee approval papers. We have developed an ESG framework to systematise the integration process of responsible investment into the Irish portfolio.

All investments in the Irish portfolio, existing and potential, are assessed using ISIF's ESG Due Diligence tool. There are two versions of the tool, one for indirect (fund type) investments and one for direct investments. The tool goes through each stage of the investment process and then is updated and reviewed periodically post investment. ESG issues are also addressed on a post investment basis as part of Annual Control Report (ACR) review process.

The initial stages of the tool highlight material risks related to the industry. ESG related risks across categories and subcategories of the industries are assessed using a combination of EBRD and SASB data. These help to identify industry-specific ESG risks and the areas ISIF should monitor and carry out further due diligence on.

An important part of the ESG review for any potential investment is the EFR (External Factors Review) and this section assesses and summaries all ESG information the company/asset publishes on their website, in reports, in their Responsible Investment Policy etc. As part of the EFR, a key word search is also carried on Google to identify if the investment has been involved in any scandals or negative ESG coverage e.g. emissions, health and safety, corruption. These sections both form part of the initial ESG assessment but will be reviewed and updated as necessary. Based on the risk review and EFR, ISIF will form an initial opinion on how sustainable an investment is and the materiality of ESG issues identified informs due diligence.

As a potential transaction progresses through the investment process stage, further due diligence is carried out through the ESG Framework Due Diligence Tool. This includes two separate steps:

- 1) ESG Due Diligence Terms of Reference (ToR) this sets out the scope and approach to be applied in undertaking the ESG Due Diligence.
- 2) ESG Due Diligence Assessment the results of the Due Diligence are to be inputted.

The findings of the ESG Due Diligence are then assessed under a variety of headings, 1) Material Findings,

2) Commercial Consequences, 3) Transaction Implications, 4) Post Transaction/Investment and 5) Exit Planning - issues to be considered by ISIF in advance and during exit planning.

For Indirect investments ISIF utilises an adapted version of the PRI DDQs. Responses to the DDQ score an investment according to their ESG commitment and categorise them in a bracket from No ESG Programme to Sustainable Value Creation.

Once an investment becomes part of ISIF's portfolio, it's commitment to ESG practices and any potential ESG risk will continue to be monitored and discussed with the investee on an ongoing basis. In cases where ESG performance or practices are poor, ISIF will engage with the company/asset to incorporate better responsible investment practices and improve ESG performance.

O No

SG 01.6 Additional information [Optional].

Overall approach to climate-related risks (using TCFD headings of Transition and Physical Risks) Irish Portfolio All investments in the Irish portfolio, existing and potential, are assessed using ISIF's ESG Due Diligence tool. There are two versions of the tool, one for indirect investments and one for direct investments. All direct investments are assessed for Climate Change Risk and Resilience: Transitional risk and Physical risks associated with the investment out to 2040 are ranked. ISIF appointed ERM as an external service provider to assist with this assessment as part of its internal tool. Transition Risks arise from the transition to a lower-carbon economy. Transition risks include financial impacts from: intensifying carbon policy, shifts in regulation and lower-carbon economy. Transition risks include financial impacts from: intensifying carbon policy, shifts in regulation and lower-carbon economy. Transition risks include financial impacts from: intensifying carbon policy, shifts in regulation and lower-carbon economy. Transition risks include financial impacts from: intensifying carbon policy, shifts in regulation and lower-carbon economy. Transition risks include financial impacts from: intensifying carbon policy, shifts in regulation and lower-carbon economy. Transition risks include financial impacts from: intensifying carbon policy, shifts in regulation and lower-carbon economic financial impacts from the properties of the prcompliance, mounting reputational pressures and fundamental shifts in the market. Depending on the pace and nature of the low-carbon transition, transition risks may pose varying levels of financial and reputational risk to ISIF and its diverse portfolio of investees. The risk identification is based on the comparison of a business-as-usual trajectory for the global economy versus 2°C low-carbon transition scenario. The most material of the three transition risks outlined in the Recommendations Report of the Task Force on Climate Related Financial Disclosure (Market & Technology Shifts; Policy & Legal Changes; Reputational Risks) have been reviewed for each sector to identify potential risk exposure. The risk ranking has been assigned based on the potential changes in company revenue and cost rising from the most material of the three energy transition areas, for example changes in market demand or emission reduction requirements. Level of risk exposure is defined as: Low-carbon scenario vs BAU: Minimal: <10% change in market demand or emission abatement costs Low risk: 10-25% "Medium risk: 25-50%" High risk: >50%" Physical Risks to businesses due to both event driven (acute) or longer-term shifts (chronic) in climate patterns. Physical risks could have material financial implications for ISIF investees such as direct damage to assets and indirect impacts from supply chain disruption. Examples of physical risk include: an increase in frequency or intensity of storms increasing plant downtime; longer term shifts in water availability or quality for food and beverage production. Since the first S&RI Strategy (2017), the ISIF monitors a range of Climate metrics across its Global Portfolio. The ISIF has also developed a GHG estimation tool for its Irish Portfolio as well as a Carbon Impact Measurement tool for its renewable investments. In 2018, the ISIF implemented the Fossil Fuel Divestment Act which provides for the divestment by the ISIF from fossil fuel undertakings, that is, companies that derive more than 20% of their revenues from the exploration, extraction and/or refinement of fossil fuels, within a practicable time. Climate considerations and analysis must be included in all Investment Committee papers including an estimated impact on the weighted average carbon intensity.

Additional information. [Optional] S&RI Strategy - Formally every two years or less if required. The Head of Responsible Investment sets objectives in line with strategy on an annual basis which are reviewed bi-annually. Private Core Assessed Indicate the internal and/or external roles used by your organisation, and indicate for each whether they have oversight and/or implementation responsibilities for responsible investment Roles ■ Board members or trustees ☑ Oversight/accountability for responsible investment ☑ Implementation of responsible investment $\ \square$ No oversight/accountability or implementation responsibility for responsible investment ☑ Internal Roles (triggers other options) Chief Executive Officer (CEO), Chief Investment Officer (CIO), Chief Operating Officer (COO), Investment Committee ☑ Oversight/accountability for responsible investment ☑ Implementation of responsible investment ☐ No oversight/accountability or implementation responsibility for responsible investment Other Chief-level staff or head of department, specify ☑ Portfolio managers ✓ Oversight/accountability for responsible investment ☑ Implementation of responsible investment ☐ No oversight/accountability or implementation responsibility for responsible investment ☑ Investment analysts ✓ Oversight/accountability for responsible investment lacktriangledown Implementation of responsible investment $\ \square$ No oversight/accountability or implementation responsibility for responsible investment ☑ Dedicated responsible investment staff ☑ Oversight/accountability for responsible investment ☑ Implementation of responsible investment ☐ No oversight/accountability or implementation responsibility for responsible investment ☑ Investor relations lacktriangledown Oversight/accountability for responsible investment ☐ Implementation of responsible investment $\ \square$ No oversight/accountability or implementation responsibility for responsible investment Other role, specify (1) Other role, specify (2) ☑ Oversight/accountability for responsible investment ☑ Implementation of responsible investment ☐ No oversight/accountability or implementation responsibility for responsible investment

SG 07.2 For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these

Head of Responsible Investment has responsibility for all aspects of the Fund's Sustainability & Responsible Investment Strategy and the implementation of it. It is broken into three main streams: (1) Overall strategy level, (2) Global Portfolio and (3) Irish portfolio

Priority issues for 2019 included:

(1) Strategic Issues

Review of Exclusion Policy & criteria, with particular emphasis on Fossil Fuel Divestment

Developed S&RI Strategy 2019 with a focus on Climate

(2) Global Portfolio

RI/ESG monitoring of all Global assets, integrated as part of regular manager monitoring cycle

Emphasis in Global Portfolio is on ESG risk analytics and active ownership as key RI/ESG tools

Analysis of Carbon Footprint & Fossil Fuel exposure

Initial climate-related scenario analysis conducted

(3) Irish Portfolio

Further embedding of ESG Tool in Irish Portfolio. All existing investments analysed using ESG tool (remaining c. 60 investments assessed through tool) and ESG/RI review completed.

ESG/RI review of all ISIF Irish transactions takes place at early stage of all potential transactions (c. 60 p.a.). Initial results determine material issues for further due diligence.

Implementation of Carbon Tools: GHG emissions and Carbon Savings Tool to assess climate risks and benefits. Carbon analysis carried out comparing portfolio emissions on an annual basis. Development of whole-of-portfolio Weighted Average Carbon Intensity metric (as well as several supplementary metrics).

ISIF Gender Diversity Plan at Irish investee level - ISIF is engaging with Irish investees to address the gender diversity of investee boards. ISIF will support Irish investees implement a plan to work towards a 30% female representation target at board level in the medium term (2-3 years). ISIF have also began to collect gender diversity data at investee level and underlying investee level (Board, Executive Committee and firm-wide).

SG 07.3 Indicate the number of dedicated responsible investment staff your organisation has.

GG 07.4 Additional information. [Optional]

Mandatory to Report, Voluntary to Disclose

The Head of Responsible Investment oversees all ESG/RI related work streams. There are also two analysts who both work c. 50% of their time on the RI team, one for the Irish Portfolio and one for the Global Portfolio.

SG 09.1

Select the collaborative organisation and/or initiatives of which your organisation is a member or in which it participated during the reporting year, and the role you played.

General

PRI 4,5

☑ Principles for Responsible Investment

Your organisation's role in the initiative during the reporting period (see definitions)

Advanced

Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional]

ISIF was actively involved in promoting the PRI through a variety of forums over 2019. Two ISIF employees attended and participated in the PRI annual event in Paris, in person. The ISIF provided feedback on the new ESG DDQs developed by PRI in 2019 and uses adapted versions for ISIF investees.

Additionally, EOS at Federated Hermes, ISIF's service provider for 2019 was an active signatory on our behalf, both leading and participating in collaborative engagements with the PRI.

☑ Asian Corporate Governance Association

Your organisation's role in the initiative during the reporting period (see definitions)

Advanced

 $\label{provide} Provide\ a\ brief\ commentary\ on\ the\ level\ of\ your\ organisation's\ involvement\ in\ the\ initiative.\ \textbf{[Optional]}$

EOS at Federated Hermes is an active member on ISIF's behalf, supporting and participating in various high-level ACGA policy briefing and engagement initiatives. EOS at Federated Hermes actively participates in and contributes to ACGA quarterly investors group calls, they have joined ACGA delegations to various Asian markets, meeting with local regulators and companies and contributed to ACGA papers on corporate governance in the region, as well as encouraging consideration of environmental and social factors.

☐ AVCA: Sustainability Committee

☐ France Invest – La Commission ESG

 $\hfill \square$ BVCA – Responsible Investment Advisory Board

CDP Climate Change

Your organisation's role in the initiative during the reporting period (see definitions)

Advanced Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional] ISIF has been a signatory of CDP global for many years and is an active supporter of the CDP Ireland, having been appointed to the CDP Ireland Network initiative participating in a number of events during the year. ISIF was past Chair of the CDP Ireland Network (2017) and was an active member of the steering group throughout 2019. EOS at Federated Hermes is also very active with CDP Global on our behalf. ☑ CDP Forests Your organisation's role in the initiative during the reporting period (see definitions) Basic Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional] ISIF is a signatory to CDP Forests. CDP Water Your organisation's role in the initiative during the reporting period (see definitions) Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional] ISIF is a signatory to CDP Water ☐ CFA Institute Centre for Financial Market Integrity ☑ Climate Action 100+ Your organisation's role in the initiative during the reporting period (see definitions) Moderate Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional] ISIF is a suporter of CA100+. In addition, ISIF's service provider, EOS at Federated Hermes is a member of CA100+ on our behalf and leads on many engagements with European based CA100+ companies. □ Code for Responsible Investment in SA (CRISA) ☐ Council of Institutional Investors (CII) ☐ Fumedion ☐ Extractive Industries Transparency Initiative (EITI) ☐ ESG Research Australia ☐ Invest Europe Responsible Investment Roundtable ☐ Global Investors Governance Network (GIGN) ☐ Global Impact Investing Network (GIIN) ☑ Global Real Estate Sustainability Benchmark (GRESB) Your organisation's role in the initiative during the reporting period (see definitions) Basic Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional] ISIF encourages external investment managers to report to GRESB, and reviews reports when available. ☐ Green Bond Principles ☐ HKVCA: ESG Committee ☑ Institutional Investors Group on Climate Change (IIGCC) Your organisation's role in the initiative during the reporting period (see definitions) Advanced Provide a brief commentary on the level of your organisation's involvement in the initiative. [Optional] ISIF's service provider, EOS at Federated Hermes, are members of IIGCC's Corporate Working Group and are working closely with the organisation

ISIF's service provider, EOS at Federated Hermes, are members of IIGCC's Corporate Working Group and are working closely with the organisation as part of the Climate Action 100+ initiative. EOS at Federated Hermes lead the Institutional Investors Group on Climate Change's shareholder resolution sub-group, including leading on the filing of one resolution, and the utilities sector sub-group. This resulted in co-drafting an open letter from investors to the utilities industry articulating investor expectations, which was supported by investors representing \$11.5 trillion of AUM.

☑ Interfaith Center on Corporate Responsibility (ICCR)

Your organisation's role in the initiative during the reporting period (see definitions)

Basic

 $Provide\ a\ brief\ commentary\ on\ the\ level\ of\ your\ organisation's\ involvement\ in\ the\ initiative.\ [Optional]$

EOS at Federated Hermes are engaged on our behalf, in terms of attending, speaking at ICCR events and collaborative engagements.

Activity included signing the Interfaith Centre on Corporate Responsibility's (ICCR's) statement on firearms. The statement sets out best practice guidelines for gun manufacturers, retailers and other companies. The ICCR agreed that in its engagement with companies, it would refer to EOS suggestion that they should publish their firearms policies. EOS believe this would enable stakeholders to understand how companies are managing

		UII	le risks that filearnis pose to employees, customers and oth	icrs, and could encourage better practice more widery.	
		ru wi Th	in by its Investor Alliance for Human Rights initiative, in which ith ready-to-use tools and illustrative case studies to support	er on Corporate Responsibility, they agreed to become a lead on a new flach EOS participate. The aim of the project was to develop a toolkit to proving their responsibilities in the area of human rights, throughout the investified leading organisations and practitioners in the responsible investment	vide investors ment lifecycle.

Describe any additional actions and initiatives that your organisation has taken part in during the reporting year to promote responsible investment [Optional] ISIF often highlights its support of PRI at some of the many external presentations it gives on the Fund, usually at industry conferences, or peer group $seminars \ and \ in \ more \ private \ peer-to-peer \ meetings. \ The \ promotion \ of \ RI/ESG \ generally \ depends \ on \ the \ nature \ of \ the \ topics \ under \ discussion.$ The ISIF participated in consultation groups as part of the development of the Irish government's Climate Action Plan 2019. The ISIF contributed to Ireland's second responsible investment "State of Play" Report 2019 and a survey on "Deep Dive Skills Analysis for Responsible Investment" conducted by Deloitte. Representatives from both ISIF and the wider NTMA contributed to and participated in various events around Climate Finance Week 2019. Our engagement service provider, EOS at Federated Hermes, has published case studies on its website, participated in academic research, responded to consultations related to responsible investment and supported the development of stewardship codes. EOS is involved in a wide range of key networks on our behalf. Private

	ISIF has direct listed equity holdings in five companies: Draper, Malin, Mainstay and Greencoat.
	In 2019 ISIF closed a total £30m commitment to Gore Street Energy Storage Fund Plc (GSF)
Listed equities -	ESG issues are largely managed via monitoring and reporting mechanisms and active ownership, with emphasis on governance issues. Any issues arising are primarily addressed through direct engagement with the company and voting rights.
ESG incorporation	Additionally, Draper Esprit plc has a dual listing with the London Stock Exchange, which is a member of the Sustainable Stock Exchange Initiative (SSEI), a collaboration focused on enhancing corporate transparency – and ultimately performance – on ESG (environmental, social and corporate governance) issues and encouraging sustainable investment. LSE have made a public commitment to sustainability in its markets and to promote improved ESG disclosure and performance among listed companies by becoming a SSE Partner Exchange. (http://www.sseinitiative.org).
Fixed income - Corporate (non- financial)	ISIF has developed an ESG Framework focussed on the bottom-up systematic integration of ESG factors across all Irish transaction both a pre-investment and post-investment basis. This tool guides investment in various sectors by identifying the relevant ESG risks in the pre-investment due diligence stage on a sector specific basis. ISIF has also established a systematic ESG monitoring for Irish portfolio as part of the Framework. This process is applicable across all asset classes, including fixed income.
	Internally Managed Direct Private equity investments include some global sustainability themed investments in issues such as was and health. ESG issues are addressed in different ways as each transaction is unique. For example:
Private equity	 Assessment of the sustainability commitment of companies as part of the Investment decision making process Environmentally positive investments in technology solutions for the waste, recycling and resource industry. Social Issues such as Data protection and risk mitigation via strong oversight at all levels. Significant attention given to governance issues across all PE transactions. Decisions taken regarding board seats - observer status or board member as appropriate on the board. ISIF is also working investee committees to improve Board diversity. Ensure appropriate subcommittee responsibilities and oversight.
	Systematic integration of ESG factors across all Irish transactions on both a pre-investment and post-investment basis across all asset classes as part of ESG framework tool which aims to guide investment in various sectors and to identify the relevant ESG rish pre and post investment.
	Ongoing ESG monitoring continues to be an integral part of investments in this sector - particularly the area of governance where I must balance its role as an active owner and state sponsored entity.
	Direct or Internally Managed Infrastructure investments include some waste to energy, renewable energy and connectivity investments. These investments typically consider and review environmental impact statements and technical due diligence report together with Health and Safety assessments as part of the overall investment decision making process.
	Some investment examples include:
Infrastructure	 Investment in a project tackling the problem of landfills and waste in Ireland. ISIF assessed ESG issues and sustainability commitment of the company as part of the Investment decision making process. Connectivity investments where ISIF assessed ESG issues and sustainability commitment of the company as part of the Investment decision making process. As is usual for ISIF transactions, emphasis was on governance issues. Renewable Energy Investments - ISIF assessed ESG issues and sustainability commitment of the company as part of the Investment decision making process. At a high level, these investments in a diverse range of renewable energy assets, are very positively aligned with the environmental focus of the ISIF Sustainability & Responsible Investment Strategy, which specifical
	emphasises climate change considerations and decarbonisation of the Irish economy over the long term as a key considera for the Fund.

7 M	landatory Descriptive General						
SG 17.1	Describe how you address ESG issues for externally managed assets for which a specific PRI asset class module has yet to be developed or for which you are not required to report because your assets are below the minimum threshold.						
Asset Clas	Describe what processes are in place and the outputs or outcomes achieved						
Fixed incom	All Fixed Income SSA holdings are monitored as part of a Global Portfolio Analytics service provided by ISS-ESG.						
	Irish Infrastructure Fund (IIF):						
	The Managers of the Fund, AMP Capital and ILIM, are both PRI signatories.						
	AMP Capital have a publicly available ESG and Responsible Investment Philosophy document. This policy is reviewed annually by ISIF.						
	ESG encompasses a broad range of issues that may of themselves, or in combination, have a material impact on the risk/return characteristics of our investments. These issues may be driven by existing or future regulations, reflect issues of significant societal concern, or pose potential operational, financial, strategic, reputational or systemic risks:						
Infrastructui	Environmental: Natural resource use and degradation, waste, pollution, greenhouse gas emissions, climate change, clean technology products and services, environmental management practices.						
	Social: Human capital, workplace health and safety, labour relations and standards, human rights, demographic changes, supplychain and community impacts.						
	Governance: Board composition and independence, executive remuneration and incentive plans, corporate accountability structures, compliance, negligence, bribery and corruption, conflicts of interest and related-party transactions, shareholder rights, accounting and audit quality.						
	The Fund has delivered some strong ESG outcomes and was ranked 2nd by GRESB in 2017 relative to European peers based on the strong performance of underlying assets such as the Convention Centre and its Wind farm portfolio.

The ESG due diligence being undertaken by ISIF on its external Managers has a dual purpose:

- (1) to make a pre-commitment assessment of the Manager/GP's responsible investment/ ESG processes, capacity and performance, and
- (2) to set up an ongoing engagement which will endure through the investment period.

Each Manager/GP is unique in terms of its culture and investment approach and focus. The level of ESG/ responsible investment maturity and capacity in each Manager/GP is expected to be influenced by capacity and size, previous requirements of investors, its intrinsic organisational culture, and the overarching fund strategy.

The scope of the ESG Due Diligence Assessment includes several aspects across the following categories:

- ESG Policies and Processes
- Management of ESG risks and value creation;
- Engagement of portfolio companies on ESG risks and issues; and
- · Monitoring of ESG performance across the fund.

SAM 02.3 Indicate the selection process and its ESG/RI components

- Review ESG/RI responses to RfP, RfI, DDQ etc.
- 🗹 Review responses to PRI's Limited Partners` Responsible Investment Due Diligence Questionnaire (LP DDQ)
- **☑** Review publicly available information on ESG/RI
- ☑ Review assurance process on ESG/RI data and processes
- Review PRI Transparency Reports
- ☑ Request and discuss PRI Assessment Reports
- f arphi Meetings with the potential shortlisted managers covering ESG/RI themes
- lacktriangledown Site visits to potential managers offices
- ☑ Other, specify

ESG Screening includes three separate steps: 1) Initial ESG Assessment based on basic information about the Fund. 2) External Factors Review - an online search of key ESG terms and parameters to identify if there is any publicly available / online commercially relevant ESG information related to the Fund. 3) Determination of next ESG steps to inform further DD.

SAM 02.4	When selecting external mar	nagers does your organisatio	on set any of the following:		
	LE	FI - Corporate (financial)	FI - Corporate (non-financial)	Private equity	Property

ESG performance development targets					
ESG score					
ESG weight					
Real world economy targets	>	₹	∵	>	¥
Other RI considerations	>	*	Y	>	Ŋ
None of the above					

You selected an 'Other' option in table SAM 02.4 above, please specify

Other RI Considerations that ISIF considers:

- · Adherence to ISIF exclusion lists
- · Commitment ro a responsible investment policy and to its continual improvement / development and implementation
- · System to incorporate ESG risk management in the Fund
- $\cdot \ \, \text{Engagement with ISIF on ESG, through ongoing reporting (at least yearly, potentially using existing governance structures) with reference to: \\$
- 1. Any changes/ updates to the ESG/ Responsible investment policy
- 2. Demonstration of the system to incorporate ESG risk management in the Fund (Fund level processes)
- 3. Portfolio company ESG performance (considering risks and opportunities)
- $4. \ \mathsf{ESG} \ \mathsf{incidents} \ \mathsf{(ISIF} \ \mathsf{to} \ \mathsf{consider} \ \mathsf{if} \ \mathsf{more} \ \mathsf{timely} \ \mathsf{/} \ \mathsf{ad} \ \mathsf{hoc} \ \mathsf{reporting} \ \mathsf{is} \ \mathsf{required} \ \mathsf{for} \ \mathsf{ESG} \ \mathsf{incidents} \mathsf{)}$

Notwithstanding, the level of responsible investment incorporation in Fund terms is expected to be influenced by the capacity and size of the GP, previous requirements of investors and fund strategy. For many domestic funds this can be a first conversation about ESG/RI so we don't implement minimal targets but instead encourage disclosure and a commitment to improvements over time.

For Property funds, the ISIF expects that managers commit to the highest level of sustainability standards and encourages GRESB reporting.

SAM 02.5

Describe how the ESG information reviewed and discussed affects the selection decision making process.[OPTIONAL]

In relation to the ISIF Global Portfolio, Investment Managers cannot be appointed unless they can adhere to the ISIF exclusion lists.

SAM 03.1 Mandatory Additional Assessed PRI 2 SAM 03.1 Indicate how your organisation typically evaluates the manager's active ownership practices in the majority of the manager selection process.

Topic or issue	Manager Selection
Conducted by	Internal staff
Asset class	All asset classes
Scope and process	Detailed pre-investment analysis of manager, including review of PRI transparency reports and completion of ESG DDQ as part of internal RI/ESG assessment.
Outcomes	ESG/RI standards were high and ISIF was very pleased to progress the transaction.

☑ Add Example 3

Topic or issue	ISIF Restricted Security list.
Conducted by	Internal staff
Asset class	All asset classes
	A number of additions were made to the ISIF Restricted Securities list. The list is in line with the Fossil Fuel Divestment Act 2018 and the ISIF High Carbon Strategy.
	Exclusions based on the Fossil Fuel Divestment Act, 2018 are companies that gain 20% or more annual turnover from the production of fossil fuels (oil, gas, peat, coal or derivative of used for combustion purposes), with production meaning extraction, exploration and refinement. The full Fossil Fuel Divestment Act, 2018 can be found at this link.
Scope and	Exclusions based on the ISIF High Carbon exclusion decision are companies that either:
process	gain 30% or more annual turnover from coal mining; gain 30% or more annual turnover from coal power, or gain 10% or more annual turnover from oil sends.
	This list (as at end 2019) has the names of 211 companies that are excluded from the investment universe for segregated portfolio holdings. With a limit of 15% exposure to the list allowed in pooled funds, this is monitored by each pooled fund Manager and the ISIF Global Portfolio Team.
Outcomes	During 2019, a number of divestments were required due to additions to the restricted securities list, the total value of divestments due to additions to the list was €86m. The updates to the list and subsequent divestment occurred in two tranches one in July and another in December 2019.
	The list can be found on the ISIF website: https://isif.ie/uploads/publications/Fossil-Fuel-Exclusion-List-Dec-2019.pdf

🗹 Add Example 4

Topic or issue	Monitoring - Climate
Conducted by	Internal staff
Asset class	All asset classes
Scope and process	In Q1 2020 we divised a TCFD aligned climate questionnaire that we sent to all 11 Managers on the Global Portfolio. The objective of the climate and carbon questionnnaire that was sent to the 11 Managers on the Global Portfolio, was to get a better understanding of how each of our Managers assesses, monitors and addresses climate risks both at an organisation level and specifically in the context of the mandate that they manage for the ISIF's Global Portfolio. The areas covered in the questionnaire are aligned with that of TCFD - governance, strategy, risk management, metrics and targets
Outcomes	The data returned has been collated and has been used to analysis the current situation in terms of manageing climate risk in the Global Portfolio. We have also used the information to look at what improvements in terms of carbon footprint and climate risks that can be made to the portfolio using our current Managers.

☑ Add Example 5

Topic or issue	Gender Diversity
Conducted by	Internal staff
Asset class	All asset classes

	ISIF has been active in 2019 considering the question of diversity and its approach with its investee companies. A Diversity Action plan was approved by PMC in June 2019 which agreed the following steps:
Scope and process	 In line with ISIF's commitment to best practice standards of corporate governance, ISIF should aim to target 30% female representation on the Boards of its investee companies. As part of the annual economic impact survey to investees, questions will be included addressing the gender diversity at all levels of the investee company. Letters will be sent out from the ISIF Director to the Chairs of the Boards of all ISIF investees outlining the purpose of the gender diversity initiative, the reason for collecting the data and purpose of implementing the target. Where 30% female representation is not instantly achievable, each investee company will be asked to provide a plan of how it proposes to reach that target within an agreed period of time.
	 As part of the ACR process, there will be a review of the direct investee entity, the composition of the investee Board or any other change that would prompt a review of the suitability of the ISIF or nominee director.
Outcomes	During 2019, ISIF started to track gender diversity statistics with the goal of continuously improving female representation on investee Boards to meet the 30% female representation target. In 2020, ISIF will be writing to all its investees outlining ISIF's gender diversity plan and encouraging investees to improve the gender diversity of their Boards.

☑ Add Example 6

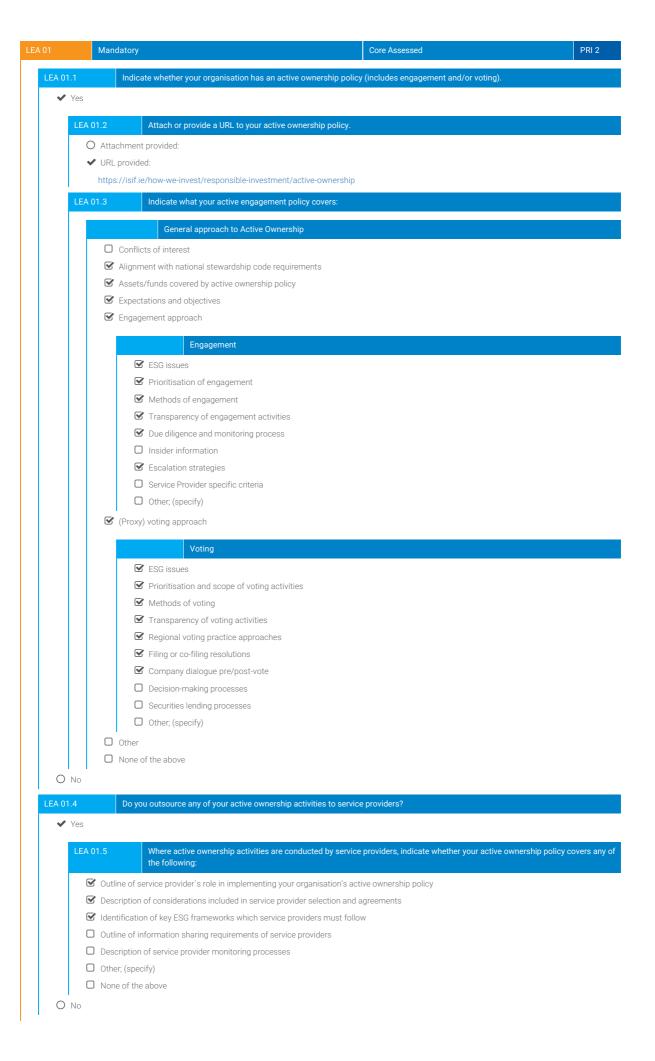

Topic or issue	Climate Metrics for the Irish Portfolio
Conducted by	Internal staff
Asset class	All asset classes
	The ISIF uses a carbon emissions model tool to provide a mechanism to model Irish portfolio emissions by combining Irish investee economic data with sector level European GHG emissions to estimate investee emissions.
	The emissions data tool facilitates ISIF in:
Scope and process	- Identifying potential high climate risk areas for risk reduction such as the largest carbon emitters and most carbon intensive companies and sectors. - Estimating the carbon footprint of its equity investments. - Engaging with managers and companies on emissions risks and reporting to inform further action on climate change – it is a first estimate. - The tool also facilitates climate risk assessment of a new potential investment in terms of emissions.
	ISIF have used the tool to track and compare estimated emissions for the Irish portfolio for year-end 2017 and 2018.
Outcomes	ISIF has developed an overlay calculation to best reflect the exposure that ISIF has to an investee within its portfolio and the impact that it has to portfolio level emissions data.
	There are two key calculations to do this; Weighted Average Absolute Emissions and Weighted Average Carbon Intensity (preferred). ISIF endeavours to drive down these metrics over time.

LEA 12.1

Indicate how you typically make your (proxy) voting decisions.

Approach

We use our own research or voting team and make voting decisions without the use of service providers.

We hire service providers who make voting recommendations and/or provide research that we use to guide our voting decisions.

We hire service providers who make voting decisions on our behalf, except in some pre-defined scenarios where we review and make voting decisions.

Based on

The service-provider voting policy we sign off on

Our own voting policy

Our clients' requests or policies

Other (explain)

We hire service providers who make voting decisions on our behalf.

LEA 12.2

Provide an overview of how you ensure that your agreed-upon voting policy is adhered to, giving details of your approach when exceptions to the policy are made.

• EOS at Federated Hermes provides us with voting recommendations based on our voting policy which are input on the voting platform prior to the vote deadline. The voting recommendations are then cast as voting instructions if there is no further intervention, except in the case of shareblocking votes. Additional information.[Optional] Answers above refer to Global Portoflio Voting process. Irish Portoflio Voting is subject to internal procedures with respect to listed equity obligations. Some features are outlined below: • Voting is the responsibilty of the portfolio team. • ISS recomendations are considered and where ISIF differs in view these diferences should be robustly considered and documented as part of the voting approval process. · NTMA Legal review is required • 2 authorised signatories must approve final decision Four eye approach used when processing vote Additional Assessed PRI 2 Of the voting recommendations that your service provider made in the reporting year, indicate the percentage that was reviewed by your organisation, giving the reasons.
