

Online Search Tool for SME Business Support

The Government has launched a new online search tool for SME Business Supports. The Supporting SMEs Online Tool is a new cross-governmental guide to help small businesses know which of the over 80 Government supports could possibly fit their business.

By answering the 8 questions in the Supporting SMEs Online Tool, a small business will, in one location:

- Find out which of the over 80 Government business supports from 27 different Government Departments, Agencies and Initiatives are available to them.
- Get information on the range of Government supports for accessing credit.
- Be told their nearest Local Enterprise Office to discuss the outcomes of the guide further.
- Be able to download all these filtered results into a document for their further use.

You can check out the Supporting SMEs Online Tool here:
